

Dear KG ProPhoto:

Our photo booth rental business, www.4flashesphotoboothdallas.com, rents photo booths in the Dallas-Fort Worth area. We also have a photo booth manufacturing business, www.photoboothworldwide.com, which sells photo booths.

I use the Shinko 2145 exclusively in my rental and manufacturing businesses. I count on its reliability, ease of use, and quality prints. I own seven of them and I have never had any problems with my printers.

When I first looked into my photo booth printer options, there weren't any printers in the market that met my requirements, other than the Shinko 2145. It is very important to me that the printer is able to automatically cut the media into 2 x 6 photo strips at a cost-effective price. Its speed and quality are second to none, and its price is in line with other dye sublimation printers. One paid photo booth rental job pays for the printer. I run a top notch operation, and the performance I get from the Shinko 2145 reflects positively on my business.

I've recently had a chance to meet with some KG ProPhoto executives. I was impressed by their knowledge of the product, their friendliness and accessibility, and the new things they have on the horizon. I know I can be confident that I will get the best quality products and exceptional service from their company.

I'm so convinced that the Shinko 2145 is one of the key pieces of equipment to bring success to any photo booth rental operation, it is the only option I offer in my photo booth manufacturing business. I want my customers to be successful so they will need to come back and by multiple booths from me. The Shinko 2145 is one of my secret weapons.

Sincere regards,

Matt Hawkinson, President
